Despite these changes, the goals of the first edition remain: To model and analyze phenomena in the life sciences using calculus. do a traditional calculus course, biology students rarely see why the material is relevant to their training. This text is written exclusively for students in the biological and medical sciences.

It is a calculus text,
written so that a math
professor without a
biology background can
teach from it
successfully. New
concepts are introduced
in a three step manner.
First, a biological
example motivates the
topic; second, the topic
