The Squashed edition of *Beyond Good and Evil* by Friedrich Nietzsche. Abridged from the original text to read in an hour or so. Squashed editions are precise abridgements - the original ideas, in their own words, the full beam of the book, the quotable quotes and all the famous lines, but neatly honed down to the length of a readable short story. "Like reading the bible without all the begats" - Prof. Jim Curtis

Prepared by U.S. linguists, this dictionary uses idioms, phrases and sentences as basic units – not single words. English-Spanish and Spanish-English sections contain modern equivalents for over 18,000 sentences.

NEW YORK TIMES BESTSELLER The revolutionary book coauthored by the Nobel Prize winner who discovered telomerase and telomeres' role in the aging process and the health psychologist who has done original research into how specific lifestyle and psychological habits can protect telomeres, slowing disease and improving life. Have you wondered why some sixty-year-olds look and feel like forty-year-olds and why some forty-year-olds look and feel like sixty-year-olds? While many factors contribute to aging and illness, Dr. Elizabeth Blackburn discovered a biological indicator called telomerase, the enzyme that replenishes telomeres, which protect our genetic heritage. Dr. Blackburn and Dr. Elissa Epel's research shows that the length and health of one's telomeres are a biological underpinning of the long-hypothesized mind-body connection. They and other scientists have found that changes we can make to our daily habits can protect our telomeres and increase our health spans (the number of years we remain healthy, active, and disease-free). THE TELOMERE EFFECT reveals how Blackburn and Epel's findings, together with research from colleagues around the world, cumulatively show that sleep quality, exercise, aspects of diet, and even certain chemicals profoundly affect our telomeres, and that chronic stress, negative thoughts, strained relationships, and even the wrong neighborhoods can eat away at them. Drawing from this scientific body of knowledge, they share lists of foods and suggest amounts and types of exercise that are healthy for our telomeres, mind tricks you can use to protect yourself from stress, and information about how to protect your children against developing shorter telomeres, from pregnancy through adolescence. And they describe how we can improve our health spans at the community level, with neighborhoods characterized by trust, green spaces, and safe streets. THE TELOMERE EFFECT will make you reassess how you live your life on a day-to-day basis. It is the first book to explain how we age at a cellular level and how we can make simple changes to keep our chromosomes and cells healthy, allowing us to stay disease-free longer and live more vital and meaningful lives.

An empowering journey through the mechanisms of the mind from one of the world's leading mental health experts. For those in pursuit of a better life, psychiatrist Marian Rojas Estapé presents the essential guide to neuroscience-driven mindfulness. Understanding your brain, managing your emotions, and being aware of your responses to stressors can give you greater self-control. Rather than a gimmicky guidebook, this is a thorough look at how our brains react to stress, threats, hyperstimulation, and the vices of our digital age. With proven techniques backed by solid, up-to-date psychiatric research, Estapé teaches us how to make the best of our lives. Combining science, psychology, and philosophy, Estapé delivers practical advice about how we can cultivate a happy existence. This includes understanding the parts of the brain, setting healthy goals and objectives, strengthening willpower, cultivating emotional intelligence, developing assertiveness, avoiding excessive self-criticism and self-demand, and mastering the proven art of optimism.

Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Recognized as a turning point in Brazilian literature, this entertaining novel of urban manners follows the neer-do-well Leonardo through his various romantic liaisons and frequent scrapes with the law. First printed in weekly installments in 1852, and later published in two volumes in 1854-55, *Memoirs of a Militia Sergeant* comprises a series of humorous vignettes held together by the adventures and misfortunes of this young rogue--who matures from a handful of a toddler into a ruffian of a boy and an idler of a young man--and his father, also named Leonardo. Manuel Antonio De Almeida tells a story in everyday language that is rich in detail of life on the streets and the modest circumstances of the free poor of Rio de Janeiro. Through satirical accounts of the escapades of characters who always seem close to the brink of some personal crisis or social misstep, yet who manage to pull through by hook or by crook, Almeida makes a subtle and incisive comment on Brazilian urban society and culture of the

nineteenth century. Now available in a new and lively translation, *Memoirs of a Military Sergeant* occupies an important position in the satirical literature of Brazil and the world.

Georges Bataille (1897-1962) was an essayist, poet, novelist and philosopher of excess. His philosophy emerges from the aesthetic avant-garde of the 1920s and 30s, when he was associated with the surrealist movement, and has since been explored by the major figures of poststructuralism and postmodernism. His classic works include *The Story of the Eye* and *The Accursed Share*. *On Nietzsche* takes up Nietzschean thought where Nietzsche left off - with the Death of God. Written against the backdrop of Germany under the Third Reich, the book explores the possibility of a spiritual life outside religion. In so doing it weaves an astonishing tapestry of confession, theology, philosophy, myth and eroticism - all shot through with the images of war.
