With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the "Austrian School," which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt's focus on non-governmental solutions, strong – and strongly reasoned – anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication.

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

*Educating About Social Issues in the 20th and 21st Centuries: A Critical Annotated Bibliography*, is comprised of critical essays accompanied by annotated bibliographies on a host of programs, models, strategies and concerns vis-à-vis teaching and learning about social issues facing society. The primary goal of the book is to provide undergraduate and graduate students in the field of education, professors of education, and teachers with a valuable resource as they engage in research and practice in relation to teaching about social issues. In the introductory essays, authors present an overview of their respective topics (e.g., The Hunt/Metcalf Model, Science/Technology/Science, Genocide Education). In doing so, they address, among other concerns, the following: key theories, goals, objectives, and the research base. Many also provide a set of recommendations for adapting and/or strengthening a particular model, program or the study of a specific social issue. In the annotated bibliographies accompanying the essays, authors include those works that are considered classics and foundational. They also include research- and practice-oriented articles. Due to space constraints, the annotated bibliographies generally offer a mere sampling of what is available on each approach, program, model, or concern. The book is composed of twenty two chapters and addresses an eclectic array of topics, including but not limited to the following: the history of teaching and learning about social issues; George S. Counts and social issues; propaganda analysis; Harold Rugg's textbook program; Hunt and Metcalf's Reflective Thinking and Social Understanding Model; Donald Oliver, James Shaver and Fred Newmann's Public Issues Model; Massialas and Cox' Inquiry Model; the Engle/Ochoa Decisionmaking Model; human rights education; Holocaust education; education for sustainability; economic education; global education; multicultural education; James Beane's middle level education integrated curriculum model; Science Technology Society (STS); addressing social issues in the English classroom; genocide education; interdisciplinary approaches to incorporating social issues into the curriculum; critical pedagogy; academic freedom; and teacher education.
