The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

In *The Birthmark*, Text Publishing's first YA fiction release, debut novelist Beth Montgomery takes us to the fictional island of Tevua, north-east of Australia. *The Birthmark* interweaves the stories of two generations of Islanders- in 1942 young lovers Tepu and Edouwe struggle to survive under the brutal Japanese occupation; and in 2004 teenage friends Hector and Lily fight an altogether different battle with boredom, poverty and parental neglect. Both outsiders for different reasons, Lily and Hector spend their summer holiday roaming through the island's thick forests and around the coral pinnacles on the beach. They discover a Japanese sword, a relic of World War Two, and soon afterwards an angry Japanese soldier begins to haunt Lily's dreams. What does the ghostly soldier have to tell Lily? When she hears a woman screaming in her dreams, why does Lily's birthmark burn? Will the sword be used again? And can the younger generation somehow resolve the crimes of the past?
