developing the independent thinking skills needed for college-level work is understanding how you think, this revision builds students' self-awareness in three ways: embedded in-chapter self-assessments, "powerful question" features, and learning preferences grids that asks them to think about how they learn in a variety of situations. The text offers a pre- and post-course assessment. The Habits for Success theme is now more integrated and practical. Students assess which habits they'll need in college and how to form those habits so they have the tools to increase their preparedness, confidence, and commitment to learning.

There are three important managerial implications. First, leaders possess and use more than one style of leadership. Managers thus should not be hesitant to try new behaviors when the situation calls for them. Second, managers should

modify their leadership style to fit employee characteristics. Employees with high achievement needs, little experience, and high need for clarity generally should receive directive leadership to increase satisfaction and performance. Today's enterprise cannot effectively function without a network, and today's enterprise network is almost always based on LAN technology. In a few short years, LANs have become an essential element of today's business environment. This time in the spotlight, while well deserved, has not come without a price. Businesses now insist that LANs deliver vast and ever-increasing quantities of business-critical information and that they do it efficiently, flawlessly, without fail, and most of all, securely. Today's network managers must consistently deliver this level of performance,

and must do so while keeping up with ever changing, ever increasing demands without missing a beat. At the same time, today's IT managers must deliver business-critical information systems in an environment that has undergone radical paradigm shifts in such widely varied fields as computer architecture, operating systems, application development, and security. The Local Area Networks Handbook focuses on this collective environment, in which networking and information technology work together to create LAN-based enterprise networks. Topics have been selected and organized with this in mind, providing both depth and breadth of coverage. The handbook will provide you not only an understanding of how LANs work and how to go about selecting and implementing LAN products, but also of
