duplicate records using fuzzy matching logic to create a distinct set of data. Automatically create and populate golden records with the best information available across source systems.

Fast, Affordable & Scalable Master Data Management Platform

With a Consolidation style, the master data is generally consolidated from multiple sources in the hub to create a single version of truth, otherwise known as the golden record. A golden record is stored in the central hub and used for reporting and reference. However, any updates made to the master data are then applied to the original sources.
