Constant migration is a worldwide phenomenon that creates sharp divisions between those who accept the need for migrants and welcome the contributions they make and those who oppose them on xenophobic grounds. Guy Arnold provides a comprehensive survey of the consequences of migration. Arnold studies both the massive internal migrations in China and India that drive economic development and the influx of cheap labour into the advanced economies of the USA and EU.

One of my favorite sites, WorldChanging posted the article Can Migration Change the World? by Alex Steffen. I applaud the fact that migration is recognized as a force that can shape the world and lead positive change: Maybe we need to start to rethink migration, not in the light of the discussions we've had in the past (huddled masses and all), but in the light of a 21st Century, globally ...

Human migration involves the movement of people from one place to another with intentions of settling, permanently or temporarily, at a new location (geographic region). The movement often occurs over long distances and from one country to another, but internal migration (within a single country) is also possible; indeed, this is the dominant form of human migration globally.

Guy Arnold provides a comprehensive survey of the consequences of migration. Arnold studies both the massive internal migrations in China and India that drive economi Constant migration is a worldwide phenomenon that creates sharp divisions between those who accept the need for migrants and welcome the contributions they make and those who oppose them on xenophobic grounds.

In Exodus, Paul Collier, the world-renowned economist and bestselling author of The Bottom Billion, clearly and concisely lays out the effects of encouraging or restricting migration. Drawing on original research and case studies, he explores this volatile issue from three perspectives: that of the migrants themselves, that of the people they leave behind, and that of the host societies where they relocate.

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

A comprehensive study of worldwide migration, arguing that it is an overwhelmingly positive phenomenon.

Migration is a politically sensitive topic and an important aspect of contentious debates about social and cultural diversity, economic stability, terrorism, globalization, and nationalism. Global Migration: The Basics examines: history and geography of global migration the role of migrants in society impact of migrants on the economy and the political system policy challenges that need to be faced in confronting a rapidly changing world economy and society. This book challenges students of geography, political science, public policy, sociology, and economics to look beyond the rhetoric and consider the real and basic facts about migration. Through detailed examinations of the scholarly literature, demographic patterns, and public policy debates, Global Migration: The Basics exposes readers to the underlying causes and consequences of migration.

Throughout history, migrants have fueled the engine of human progress. Their movement has sparked innovation, spread ideas, relieved poverty, and laid the foundations for a global economy. In a world more interconnected than ever before, the number of people with the means and motivation to migrate will only increase. Exceptional People provides a long-term and global perspective on the implications and policy options for societies the world over. Challenging the received wisdom that a dramatic growth in migration is undesirable, the book proposes new approaches for governance that will embrace this international mobility. The authors explore the critical role of human migration since humans first departed Africa some fifty thousand years ago—how the circulation of ideas and technologies has benefited communities and how the movement of people across oceans and continents has fueled economies. They show that migrants in today's world connect markets, fill labor gaps, and enrich social diversity. Migration also allows individuals to escape destitution, human rights abuses, and repressive regimes. However, the authors indicate that most current migration policies are based on misconceptions and fears about migration's long-term contributions and social dynamics. Future policies, for good or ill, will dramatically determine whether societies can effectively reap migration's opportunities while managing the risks of the twenty-first century. A guide to vigorous debate and action, Exceptional People charts the past and present of international migration and makes practical recommendations that will allow everyone to benefit from its unstoppable future growth.

Written in engaging and approachable prose, Migration, Incorporation, and Change in an Interconnected World covers the bulk of material a student needs to get a good sense of the empirical and theoretical trends in the field of migration studies, while being short enough that professors can easily build their courses around it without hesitating to assign additional readings. Taking a unique approach, Ali and Hartmann focus on what they consider the important topics and the potential route the field is going to take, and incorporate a conceptual lens that makes this much more than a simple relaying of facts.

This edited volume investigates how the role of leadership in education in various countries from around the world have been designed and implemented through educational policies and national cultures to meet the needs of new, displaced, and mobile groups of migrants and refugees.

This Report focuses on the future of migration and the capacities that will be required by States, regional and international organizations, civil society and the private sector to manage migration successfully over the coming decades. Ten years ago there were 150 million migrants. Now, the number of migrants has grown to 214 million, and the figure could rise to 405 million by 2050, as a result of demographic disparities, environmental change, global political and economic dynamics, technological revolutions and social networks. This Report argues that it is essential for States to be able to develop the comprehensive knowledge and efficient, flexible institutions that they will need to promote and implement humane and orderly policies for the movement of people, now and in the future.

This broad thematic study offers a major new research perspective on international migration in the context of globalisation.
