The E-M5 Mark III is Olympus's first mid range camera to feature PDAF focusing. With 30fps burst shooting, class leading stabilization, 50Mp High Resolution mode and many other high end features it is of necessity a complex camera. As with any digital camera the heart of the machine is the menu system, consisting of around 160 entries, many with their own sub menus offering many hundred of options. It is no surprise then that even experienced users can find themselves scratching their heads as they wade through the mass of options.. This book goes through each and every every menu choice and explains what it does and why you might want to do it. It doesn't try to teach you photography. You wouldn't have chosen a E-M5 Mark III if you didn't already have some expertise. What my books aims to do is to familiarise yourself with the E-M5 Mark III and learn to tailor it to your own taste and needs. Having done that, you I think you will find using the E-M5 Mark III not only a pleasure but inspiring as well.
