90 - Lawnmower or sawzall.

~~DECIBEL LEVELS (dba) AND SONES CONVERSION CHART ...~~

Noise is measured in units of sound pressure levels called decibels, named after Alexander Graham Bell, using A-weighted sound levels (dBA). The A-weighted sound levels closely match the perception of loudness by the human ear. Decibels are measured on a logarithmic scale which means that a small change in the number of decibels results in a huge change in the amount of noise and the potential damage to a person's hearing. OSHA sets legal
