In Stata manual, there is an option (bargap())for bar graph. It helps modify

Online Library Stata For Categorical Data Analysis

the distance between two bars. From what I read, if specify -30 for bargap, the two bars will overlap each other by 30% of the width of the bar. After your last reply, I did a lot of search and found a command-slideplot- to graph data recorded on a Likert Scale. I applied the command to my case:

Bar graph for categorical variables - Statalist

Stata Class Notes: Analyzing Data; Chi-square test. A chi-square test is used when you want to see if there is a relationship between two categorical variables. In Stata, the chi2 option is used with the tabulate command to obtain the test statistic and its associated p-value.

What statistical analysis should I use? Statistical ...

Online Library Stata For Categorical Data Analysis

Categorical Data Analysis. Categorical data is data that classifies an observation as belonging to one or more categories. For example, an item might be judged as good or bad, or a response to a survey might include categories such as agree, disagree, or no opinion. Statgraphics includes many procedures for dealing with such data, including modeling procedures contained in the sections on Analysis of Variance, Regression Analysis, and Statistical Process Control.
