Abstract. The purpose of this study was to determine the reliability and validity of the Adolescent and Adult Psychoeducational Profile (AAPEP), an assessment instrument designed for adolescents and adults with severe developmental handicaps. Subjects were 60 adolescents and adults, 30 with autism and 30 with mental retardation but without autism. The groups were matched on age and IQ.

The primary formal assessment tool utilized at TEACCH with this older population is the Adolescent and Adult Psychoeducational Profile (AAPEP) (Mesibov, Schopler & Schaffer, 1984). Adolescent and Adult Psychoeducational Profile. Hillsborough, N.C.: Orange Enterprises. Intervention for adults with autism

This book provides readers with direction on how to organize psychoeducational groups while also helping them enhance skills for effectively leading such groups—all in one comprehensive volume! Offering an applied, pragmatic approach, author Janice L. DeLucia-Waack uniquely integrates research and practice to suggest valuable leadership strategies while addressing special issues such as children of divorce, anger management, bullying behaviors, and much more.

With a section on ethical issues, this book is suitable for social science researchers and their students.

The classic text--now updated with a new interpretive approach to the WAIS?-III Assessing Adolescent and Adult Intelligence, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS?-III. Augmenting the traditional "sequential" and "simultaneous" WAIS?-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC?-IV, Kaufman and Lichtenberger have applied this system to the WAIS?-III profile of scores along with integrating recent WAIS?-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS?-III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field, covering not only the WAIS?-III but also the WJ III?, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-

to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.

Division TEACCH, located in the School of Medicine at the University of North Carolina at Chapel Hill, was one of the first programs in the country to understand that autism was an organic rather than a biologic condition. We were also one of the earliest programs to recognize the enormous variability in characteristics and behaviors of children described as autistic. For these reasons, the processes of diagnosis and assessment have always been important and central to our program. We are therefore extremely pleased to have a volume representing the most current thinking of the field's leaders in these important areas. As with the preceding books in our series, *Current Issues in Autism*, this volume is based on one of the annual TEACCH conferences held in Chapel Hill each May. The books are not simply published proceedings of the conference papers, however. Rather, conference participants are asked to develop a full chapter around their presentations. Other international experts whose work is beyond the scope of the conference, but related to the major theme, are asked to contribute chapters as well. These volumes are designed to provide the most current knowledge in research and professional practice available on the most important issues defining and clarifying autism.
